Brand New Book ***** Print on Demand *****.In richness of scientific return, the Apollo 15 voyage to the plains at Hadley compares with voyages of Darwin s H.M.S. Beagle, and those of the Endeavour and Resolution. Just as those epic ocean voyages set the stage for a revolution in the biological sciences and exploration generally, so also the flight of Falcon and Endeavor did the same in planetary and Earth sciences and will guide the course of future explorations. The boundary achievements of Apollo 15 cannot now be established. As an author of a following paper points out, the mission was not finished at splashdown in the Pacific, nor later with painstaking analysis in scores of laboratories of the samples and cores brought back, nor with careful study of the photographic imagery and instrument traces returned home. For the distinctive fact is that the mission is not yet over. Data still flow in daily from the isotope-powered station emplaced on the plain at Hadley, and from the Moon-encircling scientific satellite left in orbit. This data flow is of exceptional value because it now affords, for the first time, a triangulation of lunar events perceived by the three physically separated scientific stations that man has left on the Moon. This volume is the first, though assuredly not the final, effort to assemble a comprehensive accounting of the scientific knowledge so far acquired through this remarkable mission. The Apollo 15 mission was the first of the Apollo missions to utilize the full capability of a complex set of spacecraft and launch vehicles, the design, development, and construction of which have occupied the major efforts of the U.S. space program for the last decade. The reliability and capability...
